South Africa on Monday retained its number-one Test ranking, but slipped to sixth in the latest rankings released by the International Cricket Council (ICC). The country's performance in the ongoing one-day tournament has also not helped its cause. South Africa qualified as the number-one Test nation on the rankings table released by the ICC, but slipped to sixth place in the one-day rankings. The ICC Test rankings will be updated next month. Rising star allrounder Keshav Maharaj has improved his game in recent times and is now seen as South Africa's best hope for a better performance in the one-day format. If Maharaj's performance continues, the Proteas might be able to vault back into contention in the one-day rankings too. The Proteas' decline in the one-day rankings can be linked to the decline in their performance in the Champions Trophy last month. It was their third successive tournament in which they did not win a single game, and fell from being the number one-ranked side. South Africa are yet to win a bilateral ODI series in 2016. The Proteas have not won a bilateral ODI series in 2016. They are 2-2 in the triangular series against Zimbabwe and Australia, and have lost all their games against India and New Zealand. The Proteas have not won a bilateral ODI series in 2016. They are 2-2 in the triangular series against Zimbabwe and Australia, and have lost all their games against India and New Zealand. Virat Kohli's men retain the number one spot in the ODI rankings despite having a net run-rate (NRR) of over 3.00 in the last three years. While the Proteas have a lower NRR of 2.54, there is still a gap between the two sides in their performances. India are not ranked in the top five in any of the three ICC ODI team rankings released by the ICC - ODI
